Summary

Computer Science graduate (B.E., 2025 | CGPA: 8.5/10) with experience in **SQL, Python, Java, and data-driven application development**. Skilled in **data analysis, database management, REST APIs, and structured data processing**, with exposure to **AI/ML concepts** and analytical problem-solving.

Work Experience

Software Engineer Trainee — Infosys Limited, Mysore

Sept 2025 – Feb 2026

- Completed intensive training in **Java, Object-Oriented Programming, and Data Structures & Algorithms**.
- Developed Java applications using **OOP principles**, improving debugging and problem-solving skills.
- Wrote and optimized **SQL queries for relational database** operations including joins and data retrieval.
- Applied **Software Development Lifecycle (SDLC)** practices including coding, testing, and debugging.
- Collaborated in team-based development exercises to build efficient and scalable solutions.

Software Engineer Intern — Acadsigma Solutions Pvt. Ltd, Bangalore

Sept 2024 – March 2025

- Led development of a **web-based content generation platform** as Team Lead, coordinating **Agile delivery** across cross-functional teams.
- Improved system efficiency by **35%** through performance optimization, structured data handling, and scalable application design.
- Supported testing, troubleshooting, and stakeholder communication to ensure reliable and timely project delivery.

Skills

Languages: Java, Python, SQL

Data & Databases: PostgreSQL, MongoDB, Data Analysis, Data Processing, EDA (Basic)

Libraries & Frameworks: Pandas (Basic), NumPy (Basic), FastAPI, Spring Boot, REST APIs

Tools & Concepts: Git, GitHub, Postman, OOP, DBMS, SDLC, DSA, Agile

Projects

Hire Bridge: AI-Powered Placement Assistance Tool

Major Project, 2025

Tech Stack: FastAPI, Python, MongoDB

- Built a backend platform using **FastAPI and MongoDB** to streamline placement workflows and manage structured student data.
- Developed **RESTful APIs** for resume management, job recommendations, and secure document handling.
- Implemented **data processing and validation workflows** to improve data accuracy and system efficiency.

Real-Time Object Tracking and Motion Detection

Mini Project, 2024

Tech Stack: Python, OpenCV, NumPy

- Built a **real-time object tracking system** using **Python, OpenCV, and NumPy**, achieving nearly **95% tracking accuracy**.
- Processed and analyzed **video-stream data** for motion detection, object tracking, and automated alert generation.
- Optimized image-processing workflows to achieve approximately **30 FPS**, improving monitoring efficiency and system responsiveness.

Education

B.E. (Engineering) — KLS Vishwanathrao Deshpande Institute of Technology, Haliyal, Karnataka

2021 – 2025

CGPA: 8.5 / 10

Class 12 — Prism PU Science College, Dharwad, Karnataka

2020 – 2021

Score: 73.3%

Class 10 — KLE SCHOOL Rayapur, Dharwad, Karnataka

2018 – 2019

Score: 75.6%

scfdgf

Certifications

Microsoft Azure AI Fundamentals

AWS Cloud Practitioner Essentials

Python Training — IIT Bombay

Software Engineering Fundamentals — Infosys Springboard

[STAMP]
